

PROCUREMENT DIVISION WEEKLY REPORT FOR

PERIOD ENDING 8 August 1984

1. Progress Report of Tasks Assigned by the DCI/DDCI:

No tasks assigned during this reporting period.

2. Items or Events of Major Interest That Have Occurred During the Preceding Week:

b. Augmenting WANG Volume Capacity: For the past six months or so, the Wang System B primary disk, used by ADP & Engineering Branch (ADP&EB) and Production & Services Contracts Branch (P&SCB), Procurement Division, Office of Logistics (PD/OL), has been running from 85 to 93 percent full. After discussing the problem with Wang's Susan Blanton, our Customer Service Administrator (CSA), she informed us that when a document is HOT PRINTED or when a Visual Memory file is sent to the printer, the system creates a document (TEMPTEXT or TEMPDOC) that seems to float around the disk, taking up needed disk space; in our case, some TEMPDOCs were over 400 sectors EACH. Deleting these unnecessary nuisances from the Volume cleared 15% of the disk. These documents can be deleted by the Systems Administrator using the Services Utilities menu in a few seconds. This information has been offered given the disk space problem on Wang Systems C and D discussed in a recent Logistics Instruction ☐

c. Critical Design Review For LIMS BOC: A Critical Design Review (CDR) of the Basic Operating Capability (BOC) for the Logistics Integrated Management System (LIMS) was held on 1 & 3 August 1984 for both users and Senior Executives, respectively. The reviews were held with members of the Office of Logistics (OL), Office of Finance

C O N F I D E N T I A L

(OF), Office of the Inspector General (OIG) and the Office of Data Processing (ODP) in attendance. The CDR was successfully completed with no outstanding action items to be resolved relative to BOC's.

e. NOMAD 2 Technical Support: A request was received from the Analytic Support Group (ASG) of the Deputy Director for Intelligence (DDI) for NOMAD 2 technical support in the form of consulting services, applications development, and training. A proposal has been received from D&B Computing Services and is currently being audited. Award of a firm fixed price - level of effort contract in the amount of approximately \$250,000 is anticipated on or before 31 August 1984.
